## Verrutop® is a new type of professional\* treatment for warts and verrucae

- The nitri-zinc complex kills the wart tissue by breaking down its protein structure, leaving intact skin underneath
- No pain has been reported in clinical studies, either during application or afterwards
- Verrutop® is suitable for adults and children as young as 6 years

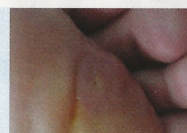

Immediate whitening after application of Verrutop®

After 15 days: complete remission

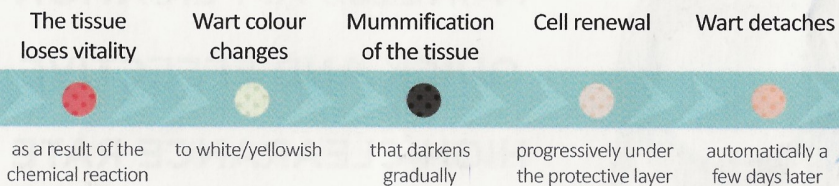

Before application of Verrutop®

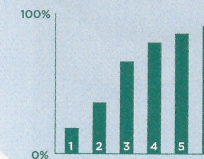

After 15 days: complete remission

Poster presented by Galloni Ch. at the 27 th EADV Congress France 12-18 sept 2018 N= 766 warts

80% of patients saw  
clearance within 4  
simple applications

\*Verrutop should be applied by a healthcare professional
